Was ein Schlüsseldienst beachten muss

Forderungen und Sorgfaltspflichten

Verwendung von Rohlingen

Es gehört zu den Anforderungen, die an eine verantwortungsbewusste Schlüsseldienstführung gestellt werden, dass für die Anfertigung von Schlüsseln stets die dem Musterschlüssel genau entsprechenden Schlüsselbart-Schweifungen verwendet werden. Ist ein solcher Rohling nicht sofort greifbar, so ist keine Profilvereinfachung zu verarbeiten, sondern der ordnungsgemäße Rohling zu beschaffen oder durch Bearbeiten eines geeigneten Bartes herzustellen.

Berechtigungsnachweise

Das Führen von Berechtigungsnachweisen dokumentiert die dem Schlüsseldienst obliegende Sorgfaltspflicht und empfiehlt sich vor allem, wenn Zweifel über die Kaufberechtigung entstehen könnten, zum Beispiel beim Anfertigen von:

- Schlüsseln nach Schloss
- Tresorschlüsseln nach Schloss oder Muster
- Schlüsseln zu Schließanlagen
- oder beim Öffnen von Wertbehältnissen in Laden oder Werkstatt

Ein Hinweis, dass diese Maßnahme zum Schutz der Kunden selbst geschieht, dürfte in allen Fällen echten Schlüsselbedarfs auf Verständnis stoßen.

Eine Druckvorlage für den Berechtigungsnachweis finden Sie auf unserer Homepage:

For what a locksmith has to take care

Demans and duties

Use of key blanks

It is absolutely necessary for a responsible locksmith, to use for copying of a key only a key-bit-form which will be absolutely identical with the sample. If such a key blank is not directly available, do not use a similar key-bit-form, but do everything to get the corresponding key blank or produce it yourself by using a suitable key-bit.

Authorization certificates

The keeping of the so called authorization certificates can proof the locksmith's diligence-duty, especially, when there are doubts regarding orders for:

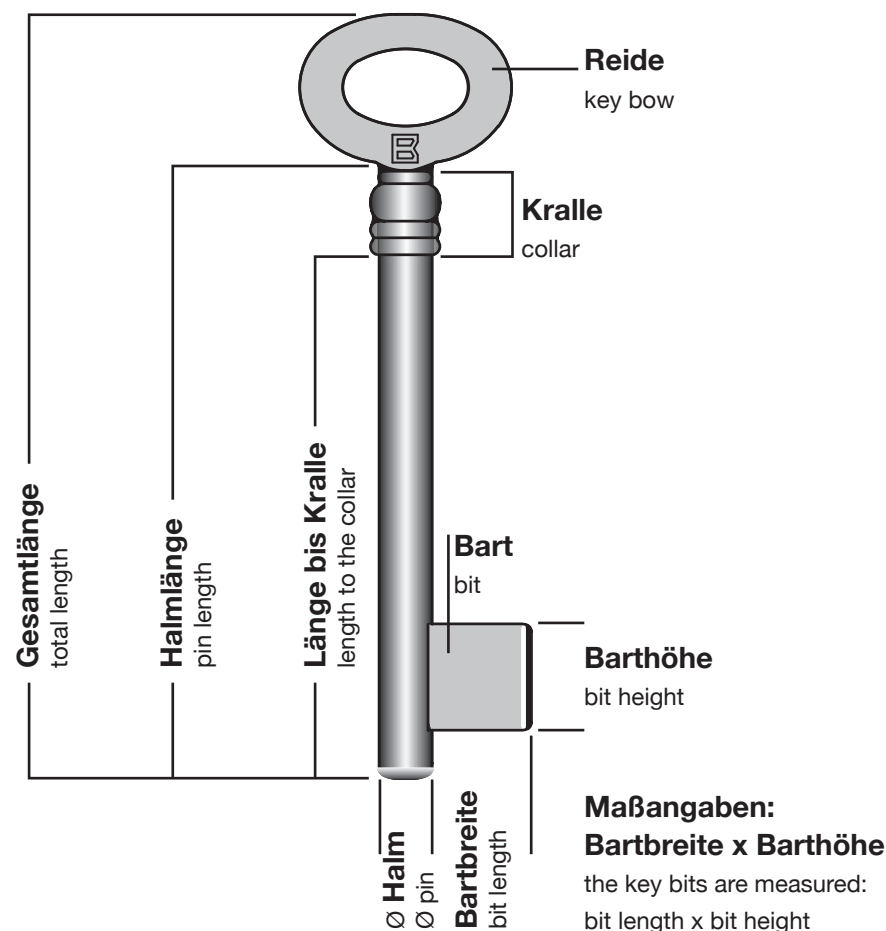

- keys to locks without sample
- safe keys to locks or to samples
- keys for master key systems
- opening of boxes with valuables in stores or workshops

In case of a real demand in keys each customer will understand that such an action is for his own security.

Download the form authorisation certificate on our homepage:

Zum Kataloginhalt Regarding the contents of the catalogue

Die Schlüsselabbildungen entsprechen der Originalgröße der Schlüssel.

The key-pictures correspond to the original size of the keys.

Die Schlüsselbart-Schweifungen sind von der Reide aus gesehen und stellen das Schlüsselloch dar.

The direction of sight regarding the pictures of the different illustrated key bits is from the key bow to the bit. The pictures represent the key hole.

Die Maßangaben sind Richtwerte, die je nach Fertigungsladung Abweichungen aufweisen können.

The measurement-details are standard values which can vary from production-lot to production-lot.

Zur besonderen Beachtung !

For the special attention !

Außer der Artikel-Nummer sind bei allen Schlüsseln **fett kursiv** auch die 10-stelligen EDV-Nummern angegeben. Nach beiden Bezeichnungen, bevorzugt nach den EDV-Nummern kann bestellt werden.

Beside the article-number we also listed **fat italic** the 10-digit part-number of our electronic data-processing-system. When ordering you can use both numbers, but we would prefer the number of the electronic data-processing-system

Die so gekennzeichneten Bartschweifungen sind nicht mehr lieferbar.

The marked key bits are not any longer available.
